

Colours that Elevate Spaces

Colours set the mood of a space and give it a distinct personality. Within each of our product range, we offer an array of colour and shade options to meet your aesthetic design needs with no compromise on the acoustics performance.

CHROMA PANELS

WOOL FELT

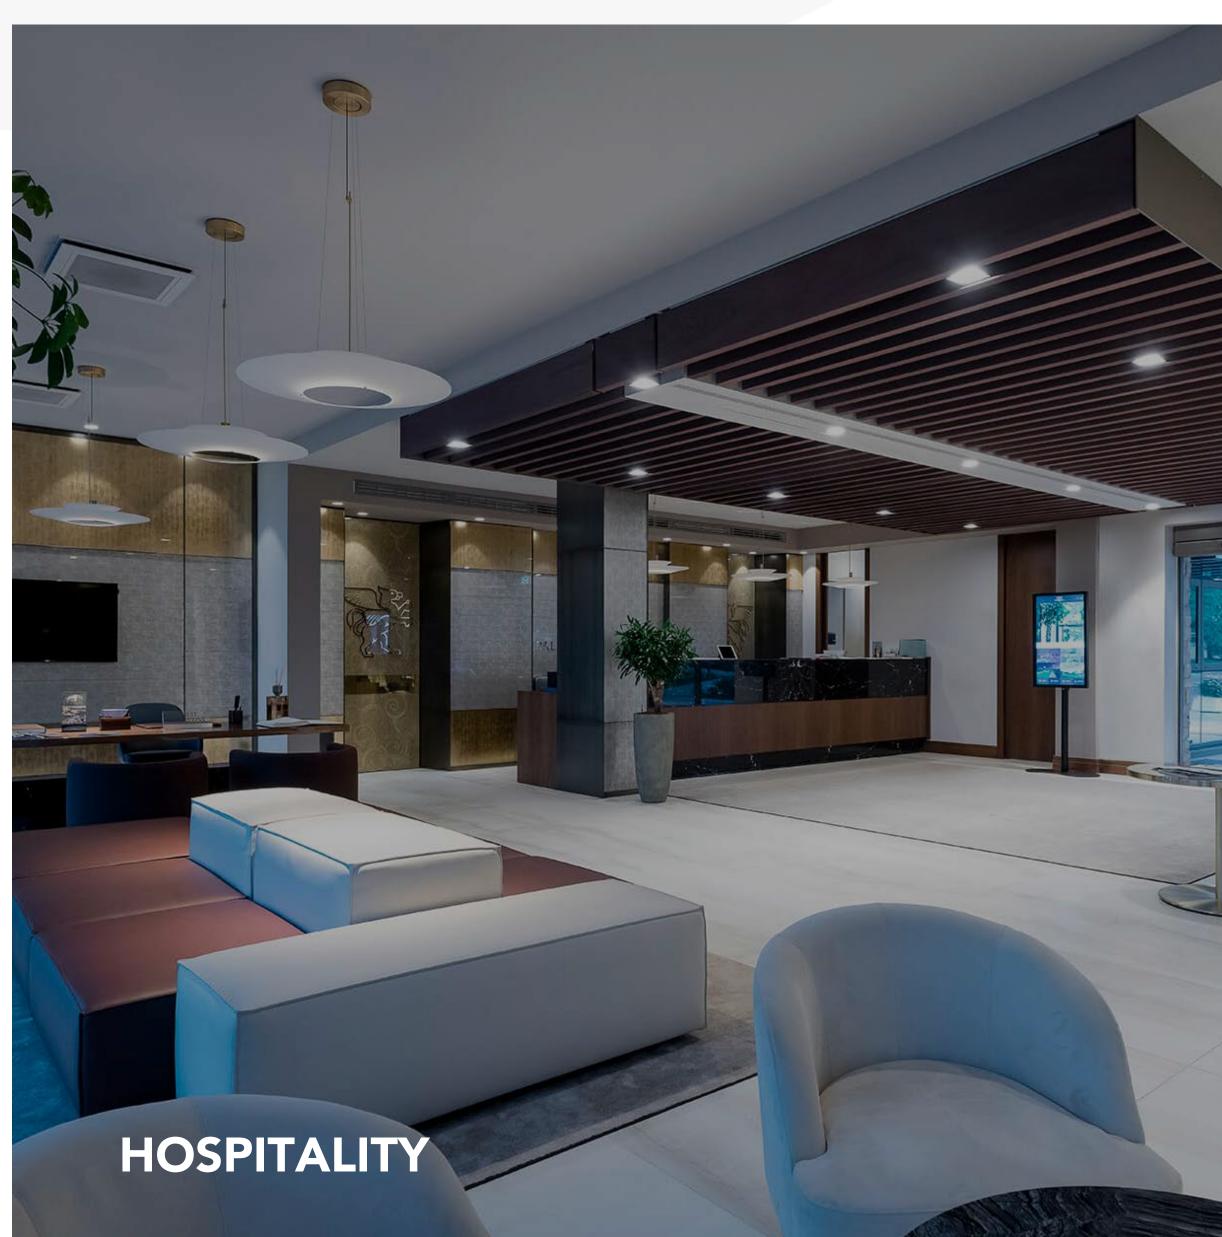

Acoustics in Action

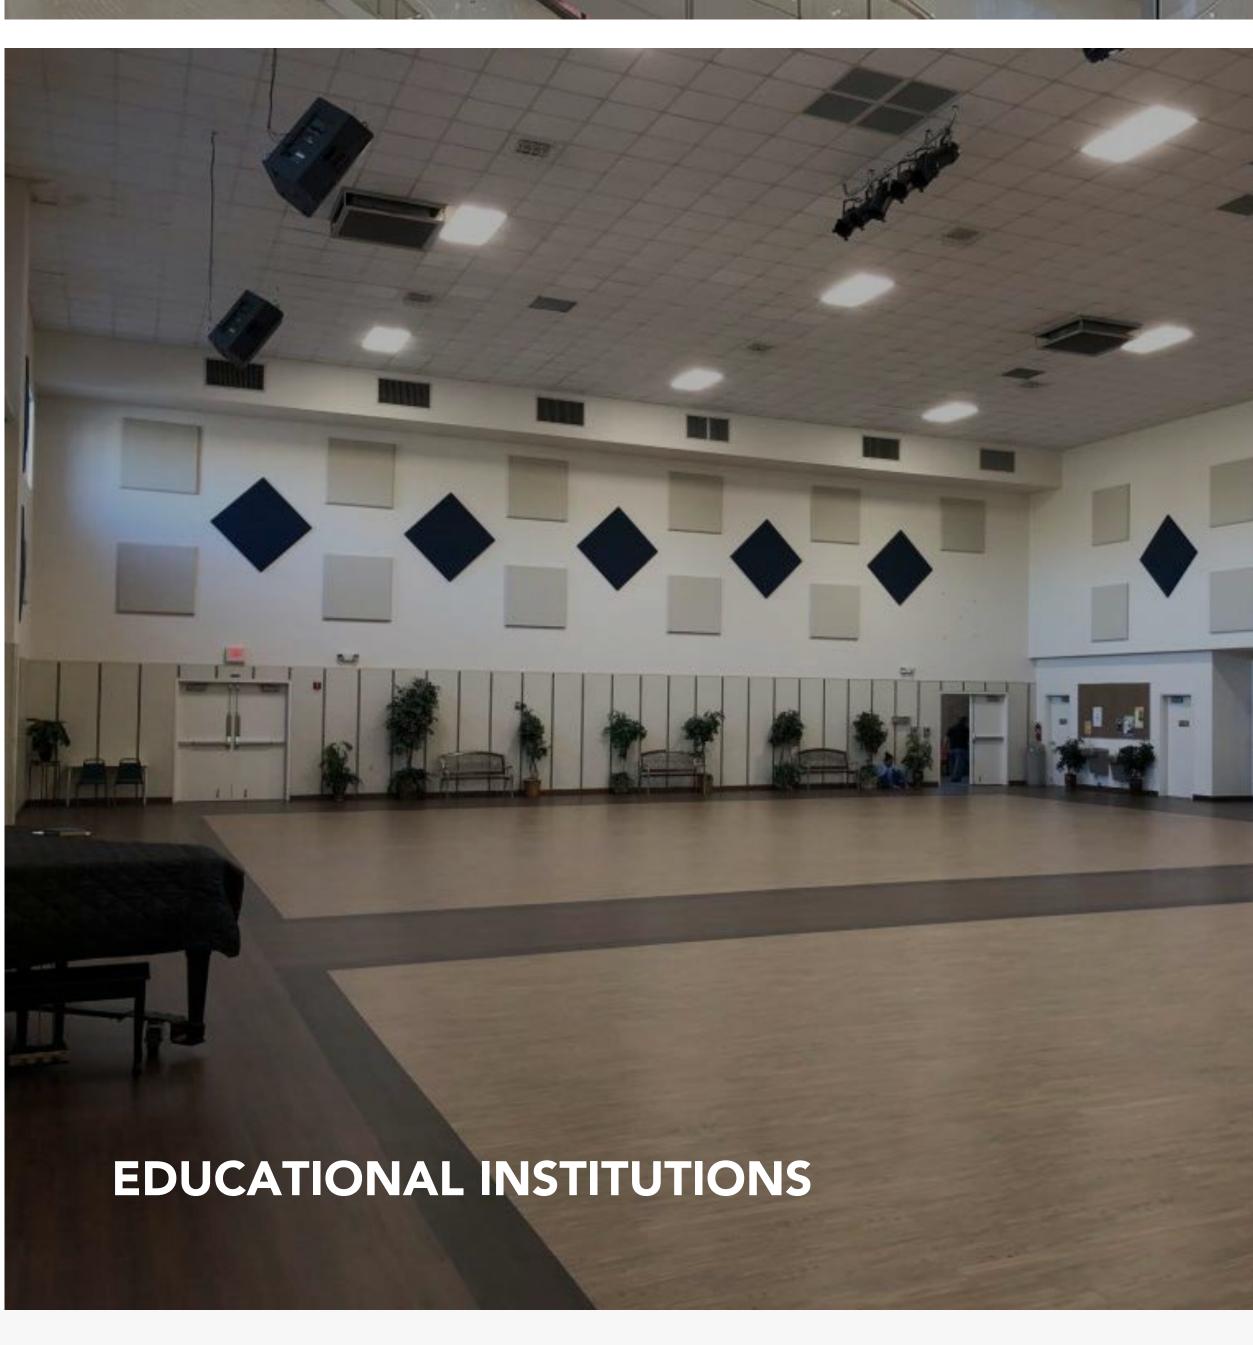

From workspaces designed to maximise productivity to auditoriums and home theatres absorbing background sounds – good acoustics can transform experiences.

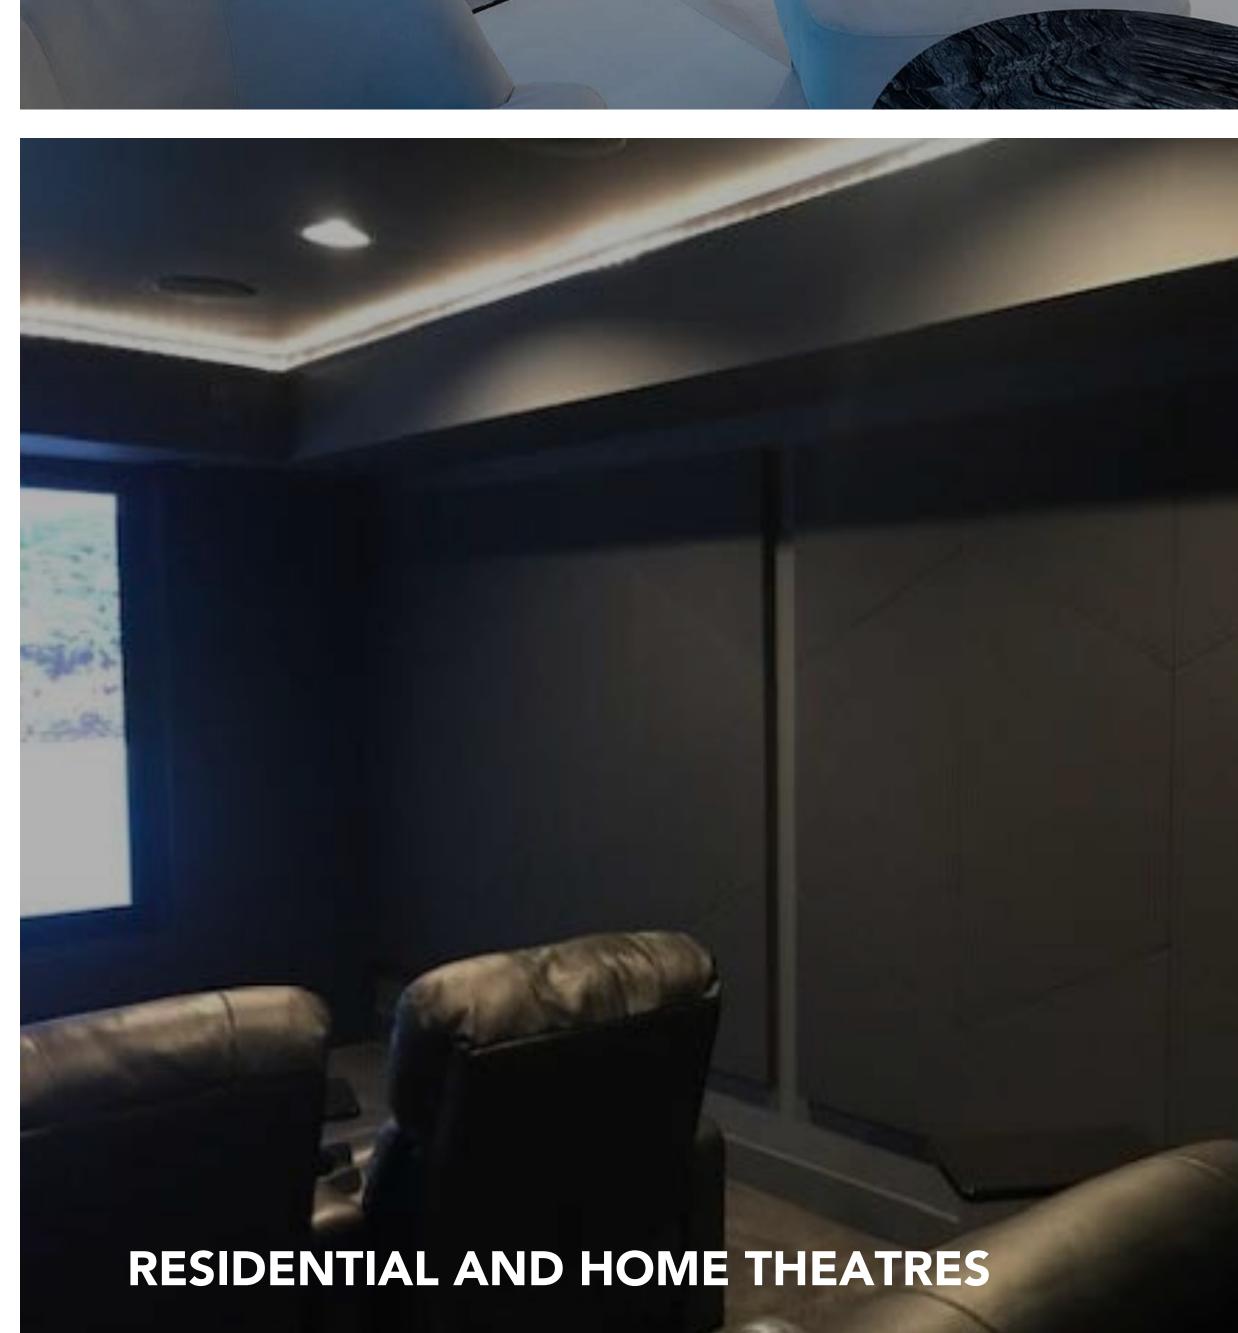

Seamless Experience

As leading suppliers of high-performance interior solutions, we are backed by years of industry expertise. Our customer-centric approach and personal attention to clients is what sets us apart.

We source our products from across the globe and store them in a secure facility, thereby ensuring timely delivery nationwide. We look after your customisation needs to achieve your aesthetic vision.

Spaces **About**

Serge Ferrari

In collaboration with Serge Ferrari, we provide high-performance solar protection fabrics that are lightweight and durable. These products are known for their optimal acoustic, visual and thermal comfort.

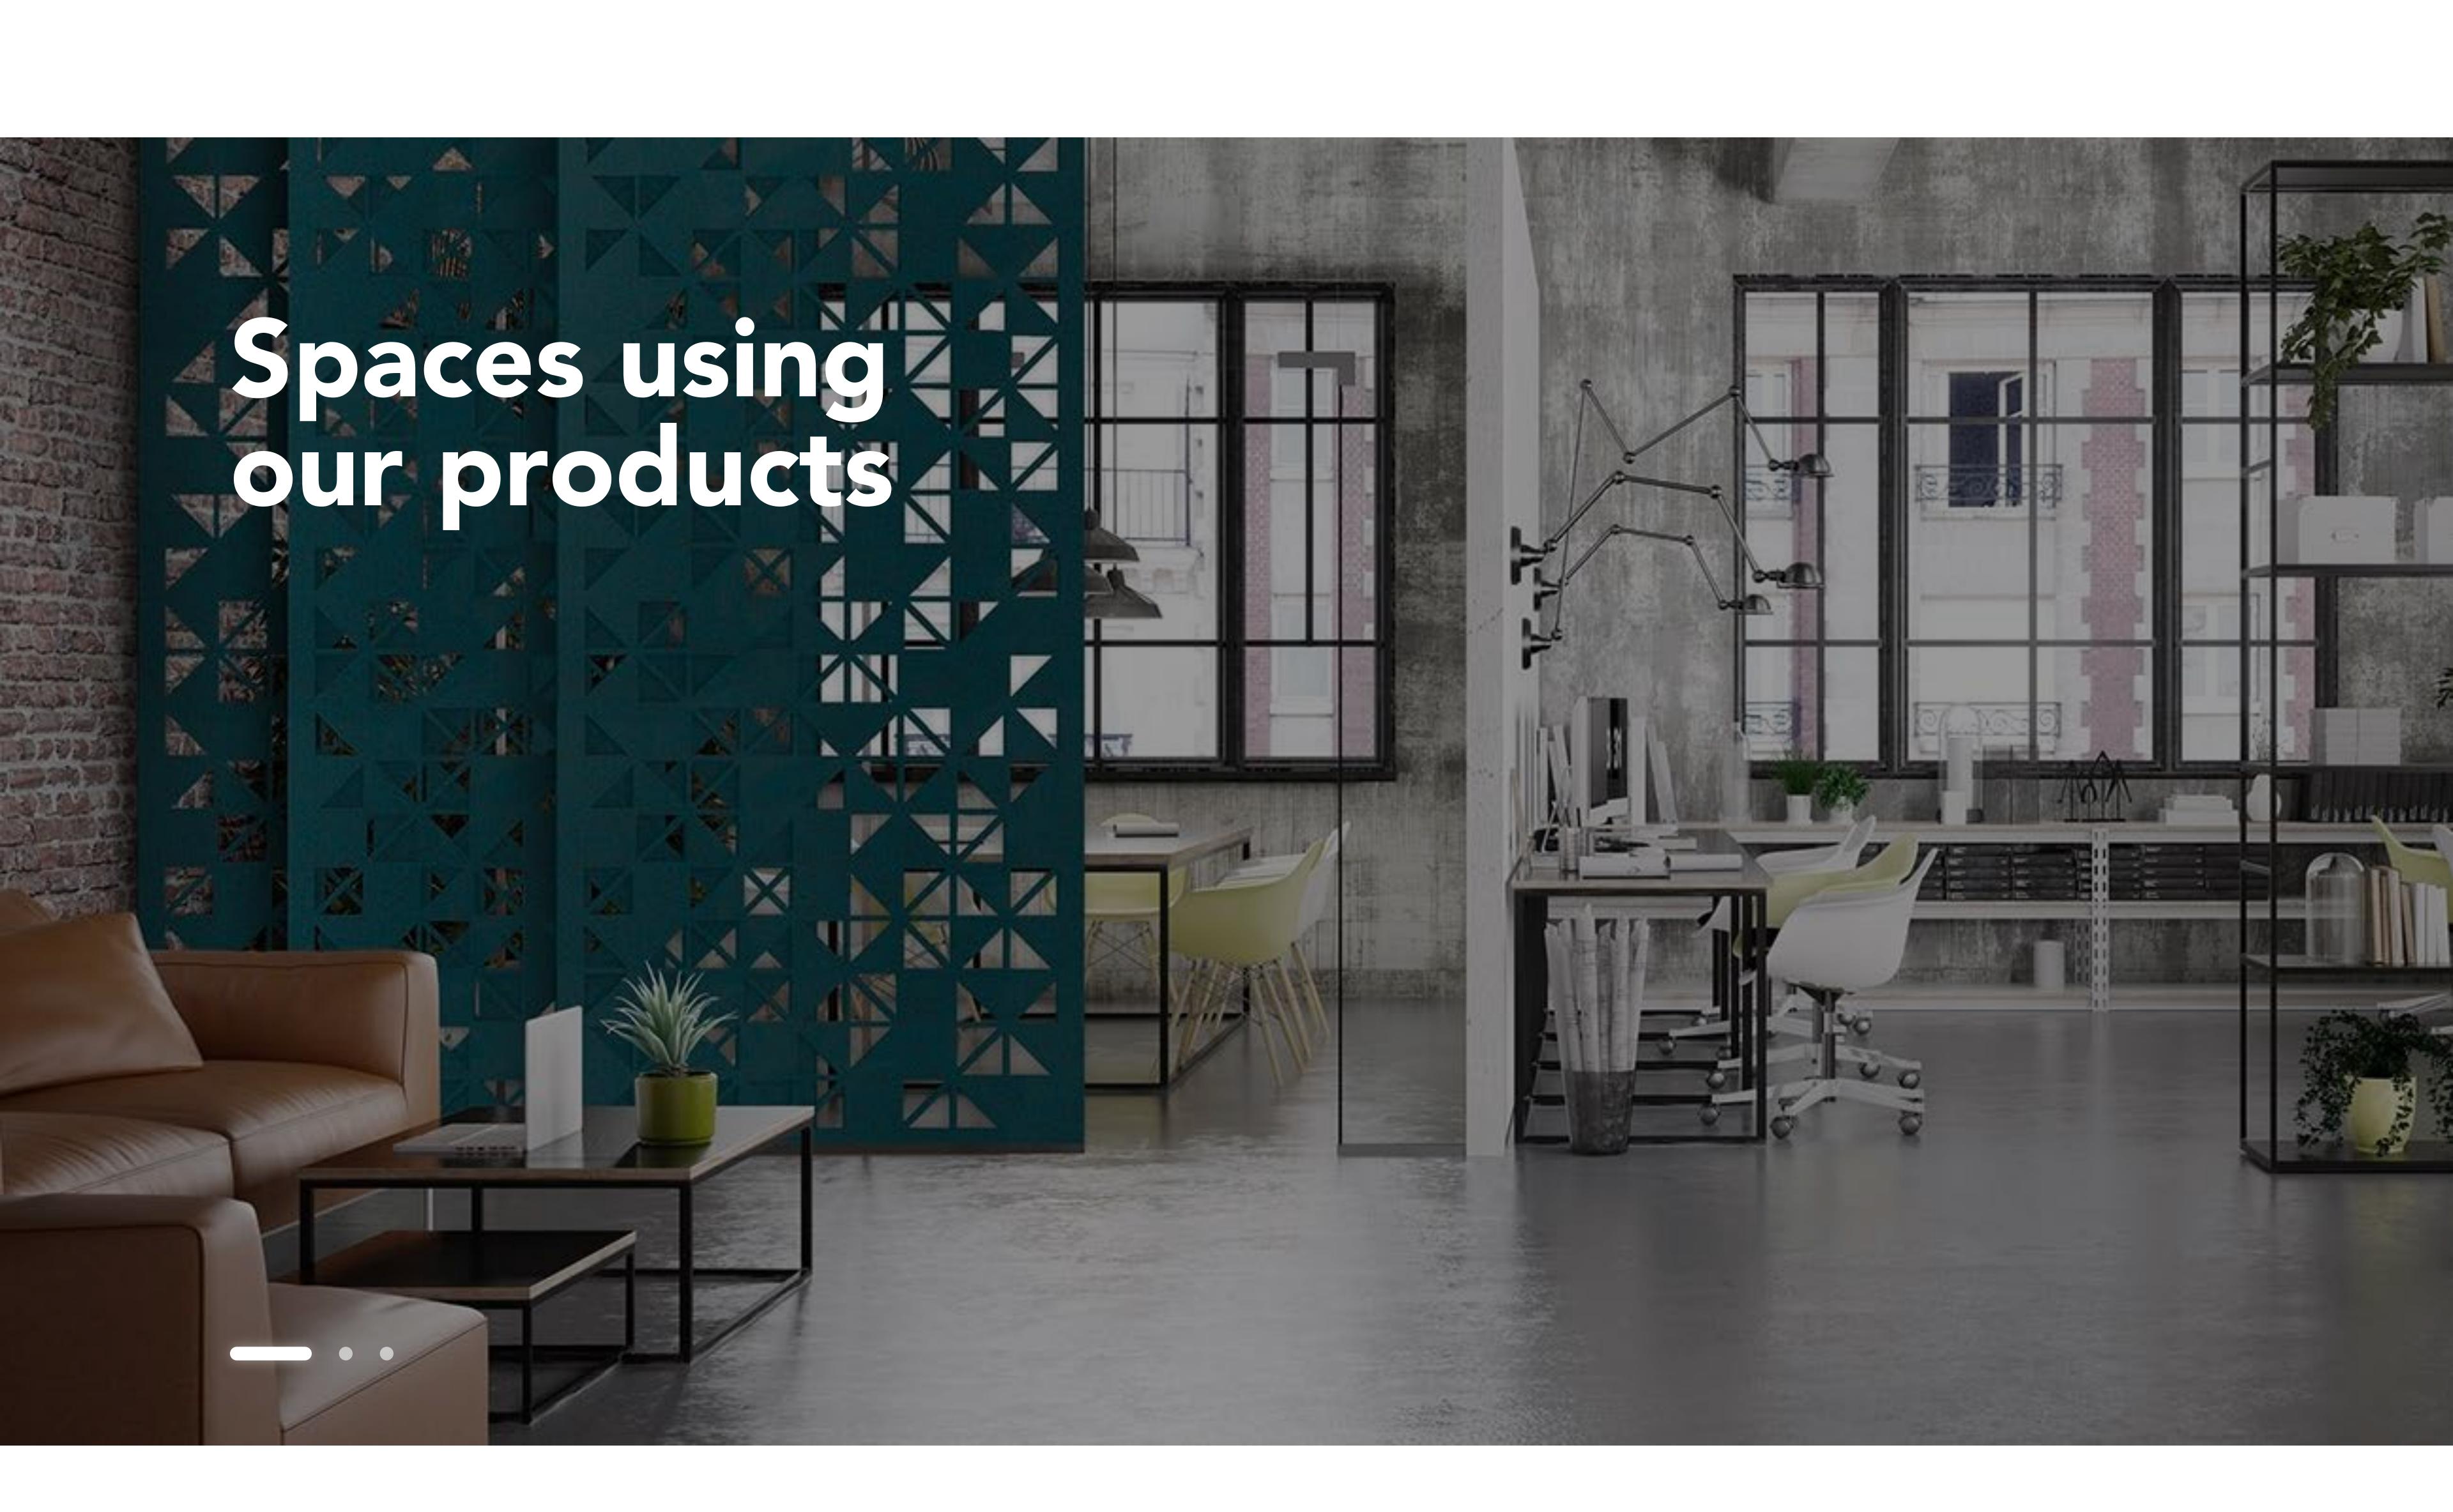

Roller Blinds

Using Précontraint technology, Serge Ferrari is a leading manufacturer of fabrics for roller blinds. We partner with this cutting-edge company to offer indoor blinds that are designed to provide superior thermal performance and light management, while adding an impressive edge to the interiors of a space.

Furniture Fabrics

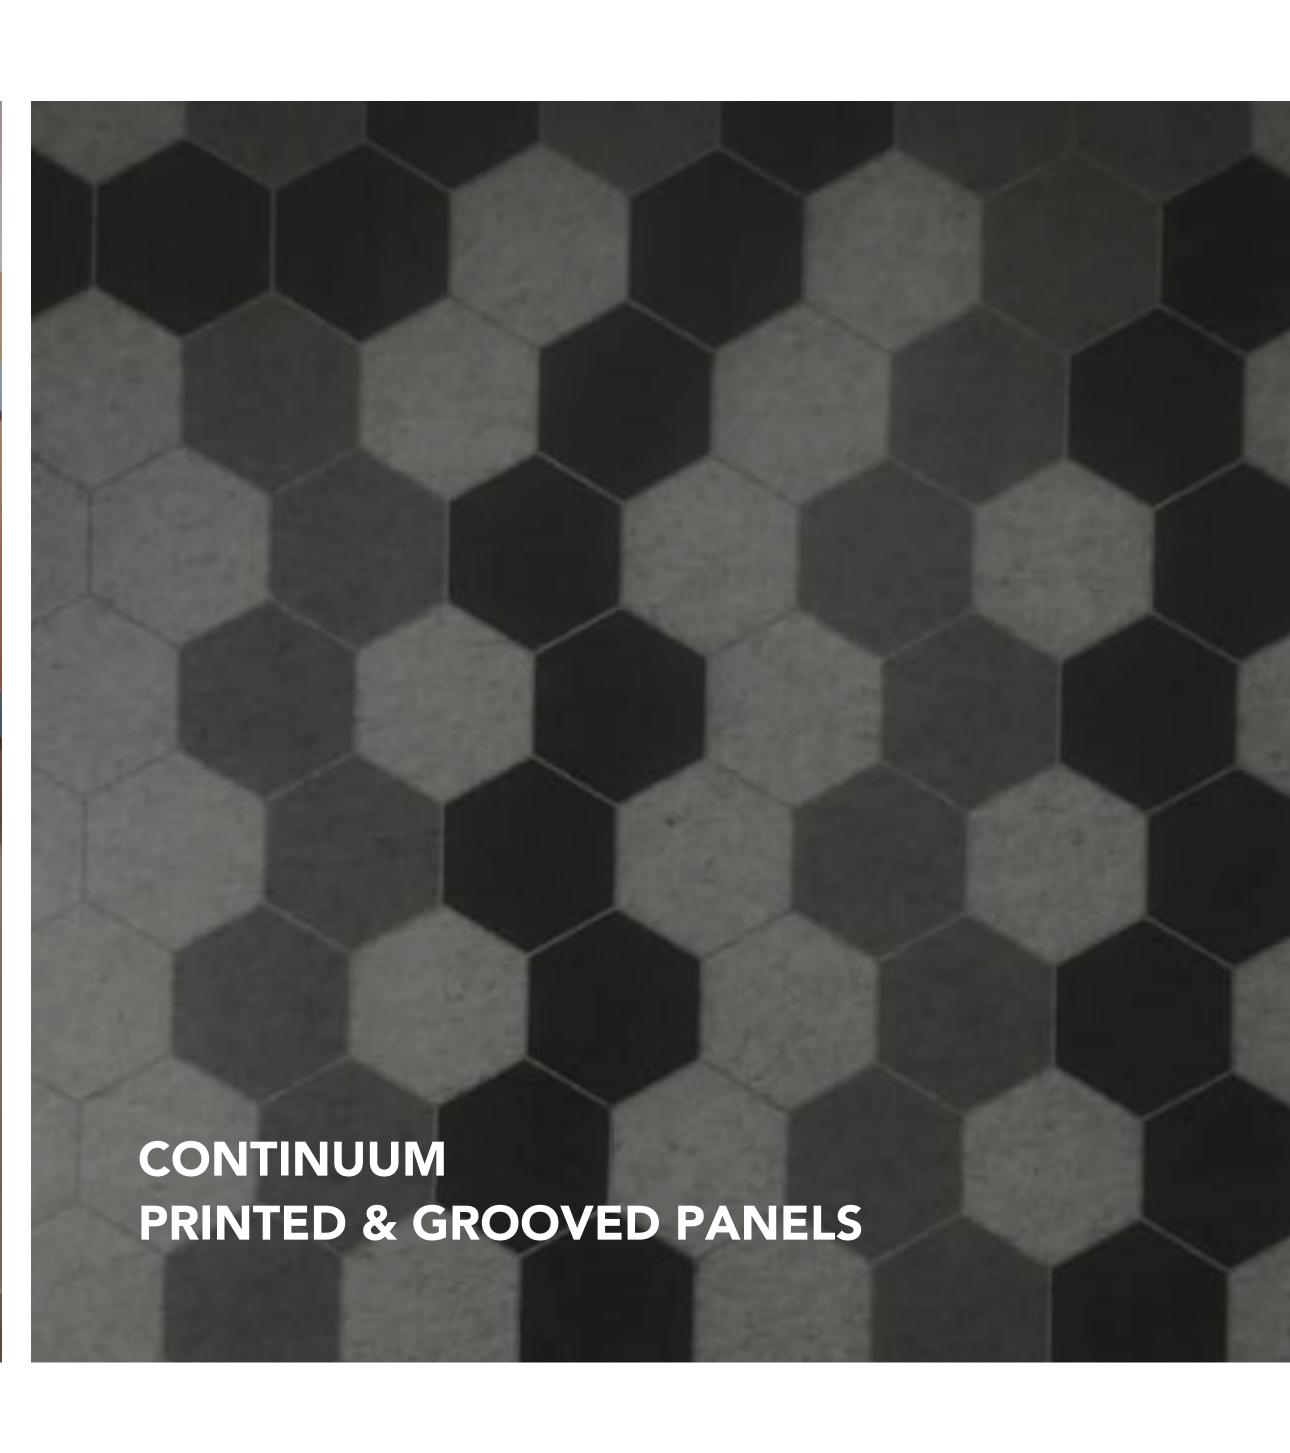

With Serge Ferrari, we provide furniture fabrics for indoor and outdoor upholstery that are durable and cleanable. These fabrics are not only resistant to water and tearing, but also fit curved and complex shapes perfectly. You can take your pick from an array of colours and textures.

About

Our Identity

We are in the business of creating inspiring spaces

Beyond the ordinary and predictable, there lies a world of untapped creative possibilities – and we are here to empower our clients to tell their stories through innovative designs.

Spaces capture the essence of those who design them and instil a sense of belonging for those who use them. With our customisation options, you can push the boundaries of your imagination through our range of bespoke products.

'Continuum' embodies our two core values – constant innovation and longevity of our partnerships and products.

About Continuum

Our roots run deep

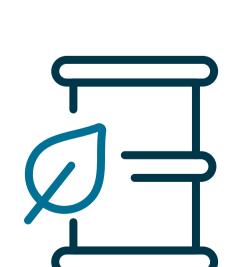

We have been a part of the interior design fraternity for several decades – embracing the pulse of the industry with our consistently evolving portfolio of products and services.

The future is our focus

Our strong foundation and sharp instincts keep us ahead of the curve. With a fresh outlook and an eye to the future, we experiment with modern design solutions that solve problems even before they arise.

Recycled Material

Our wide range of acoustic products are made from recycled PET plastic bottles that may have ended up in landfills, polluting our environment.

Efficient Process

Plastic bottles are collected, washed and shredded into flakes. These flakes are melted to make polyester yarn, which is then knitted or woven into fabric.

Eco-friendly Products

We convert recycled plastic into sound-absorbing substrates that are lightweight and durable. This polyester material offers high quality acoustic comfort and is flexible, customisable and easy to install.

Safe and Sustainable

Along with being 100% recyclable, our products are nontoxic, non-allergenic, non-irritant and have low VOC. Our products have certifications from various environmental regulatory bodies.
